DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19-36 rejected under 35 U.S.C. 102(b) as being anticipated by Ito (US 6,290,017). Ito discloses:

A mainframe (**3**) which includes a head pipe;

a pair of right and left subframes (**51**), extending obliquely downward to the rear;

a motor (**9**) supported by and suspended by the main frame and subframes such that the motor is not supported from below (Fig. 3);

a connection portion of the main frame and subframes is located ahead of a portion of the main frame (**57**) supporting the motor (Fig. 3), wherein the main frame supports the motor at its rear end (rear portion of **57** supports motor).

The cross sectional area of the main frame changes such that the front end is larger than the rear (Fig. 3).

The subframes include bent portions (**51R**) bent convexly downward and support the motor, wherein the bent portions also support rear arms (**13**).

Ito also discloses an engine with a crankcase (**71**) connected to the subframes and a cylinder (**77**) which is connected to the mainframe, wherein the cylinder extends obliquely upward toward the front of the vehicle;

Art Unit: 3611

right and left brackets (end portions of **51R**); and
a pivot shaft (**66**) that penetrates through the right and left brackets, wherein the brackets are interposed between the motor and rear arms (Fig. 3: portion of motor connected to bracket is displayed with hidden lines and the portion of the rear arm connected to the bracket contains solid lines).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ito in view of Imani (US 4,445,585). Ito discloses as discussed above, in addition to an air cleaner (**23**) arranged in a front to rear direction of the vehicle, But does not directly disclose a battery. Imani discloses a motorcycle with a battery (**53**). Therefore, it would have been obvious to a person having ordinary skill in the art at the time of the invention to modify Ito as taught by Imani in order to provide a source of power for the vehicle.

Response to Arguments

5. Applicant's arguments, see Arguments, filed 3/05/09, with respect to the rejection(s) of claim(s) 19-36 under 35 USC § 102, regarding the motor suspension, have been fully considered and are persuasive. Therefore, the rejection has been

Art Unit: 3611

withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art.
